NetMRI Base Bundle

The efficient and agile deployment, configuration, and turn-up of your new instance of Infoblox NetMRI is critical to supporting your business objectives. You may be faced with the complicated task of installing and integrating NetMRI in the most effective way while, at the same time, under pressure to shorten the time to value for your business. Basic NetMRI training helps but does not offer the practical experience required to implement the solution for the first time, without potential risk and time lost.

Business Problem:

- Have you been tasked with introducing NetMRI integration and automation as a means to improve operations?
- Is there an immediate expectation to realize and demonstrate ROI as quickly as possible with your planned NetMRI integration?
- Are you concerned that you may not be familiar with NetMRI capabilities and implementation procedures, to implement a new NetMRI solution efficiently and effectively?
- Are your NetMRI trained resources knowledgeable enough to address real world problems that fall outside of what is normally covered in basic NetMRI training, enabling them to effectively install NetMRI?

Solution Approach:

Utilize an experienced 3rd party to optimize the one-time NetMRI implementation tasks.

EmpoweredDeploy™ – NetMRI Base Bundle Implementation is the base level assistance that Empowered provides to any customer requiring this approach.

About Empowered

Empowered Networks optimizes core networking, security and compliance for many of the world's largest companies. Our dedicated team makes applications, networks and services more agile, more visible, and more dependable. For over 20 years, we've been driving positive business outcomes that translate directly to your bottom line.

Solution Description:

EmpoweredDeploy™ – Empowered's NetMRI Base Bundle Service is our solution for the turn-key implementation for standard NetMRI. We will assist you with the project management, implementation and configuration for your environment.

NetMRI Base Bundle Implementation includes:

- Initial Configuration
- Appliance Upgrade
- Initial Discovery
- Analysis of Discovery results
- Grouping
- Rules and Policies
- Basic Scripting
- IPAM Integration
- Integration with authentication services
- Backup configuration
- Knowledge transfer
- Automatic Failover if required

Business Outcomes:

- Effective implementation of NetMRI ensures your Return on Investment (ROI)
- Expedited time to value
- Reduced risk associated with potential NetMRI implementation issues
- Ensures best practices are followed and business outcomes are achieved
- Positioned well to continue to improve operational automation
