Customer Success Story

Solution Offering: MergeAssist Network Assessment Service

Challenge:

A large Healthcare company decided to divest one of their divisions they had a mandate to remove all connectivity between the two divested companies and to execute this divestiture in less than two weeks. Regulation required they must make a clean split and prove actual segregation.

It was critical that it be done correctly to comply with HIPAA and other compliance regulations. Compliance in healthcare comes with even higher stakes than in other industries. Healthcare organizations are held to strict standards, regulations, and laws from the federal and state levels. Violations of these laws can result in lawsuits, hefty fines, or the loss of licenses.

The customer dealt with first responders in emergency situations. Failure to correctly segregate the network could cost lives. All the devices within the combined organization had been engrained into the network for so many years it was difficult to distinguish what division utilized the devices.

About Empowered

Empowered Networks optimizes core networking, security and compliance for many of the world's largest companies. Our dedicated team makes applications, networks and services more agile, more visible, and more dependable. For over 20 years, we've been driving positive business outcomes that translate directly to your bottom line.

Solution:

The customer decided to utilize Empowered to execute a MergeAssist Network Assessment. The assessment goals were to:

- Map the network using NetMRI,
- Identify every device,
- Classify devices by type,
- Group devices by subnet and location where applicable,
- Identify connected end hosts,
- Create reports,
- Separate networks

Results:

The customer completed the separation of networks and were audit ready after the successful divestiture. With the help of Empowered's MergeAssist Network Assessment the customer was able to show that they were completely divested.
