# Infoblox NetMRI Value-Added Services

*Helping NetMRI Customers Obtain Maximum Value*

Are you getting maximum value from your investment in Infoblox NetMRI?

Let Empowered Networks help ensure that you are.

## Are you getting the value you need from Infoblox NetMRI?

Infoblox NetMRI is the leading automation solution for network change, configuration, security policy, and compliance management—and the only solution today that manages both traditional and virtualized VRF networking for multivendor environments with a single appliance. NetMRI is a key solution for managing dynamic and complex environments such as virtualized and cloud networks, and it provides management support for IPv6 deployments.

Empowered Networks offers Value-Added Services for Infoblox NetMRI, including:

### NetMRI HealthCheck

Empowered delivers a low-cost, high-value inspection of your existing NetMRI installation. We check the configuration, operation and maintenance of your appliance and help you understand and resolve:

- Managed device discovery issues
- NetMRI software upgrade path
- Polling optimization
- Backup and recovery challenges

### EmpoweredAdvisor™ for NetMRI

EmpoweredAdvisor™ is an add-on service for existing NetMRI customers that provides a constantly- updated, curated feed of manufacturer security bulletin content. Our data feed takes raw data published by the manufacturer and creates NetMRI rules and policy from them. These policies are automatically collected from our secure cloud and loaded onto your NetMRI appliance.

## About Empowered

Empowered Networks optimizes core networking, security and compliance for many of the world's largest companies. Our dedicated team makes applications, networks and services more agile, more visible, and more dependable. For over 20 years, we've been driving positive business outcomes that translate directly to your bottom line.

### NetMRI Training

Empowered is an Infoblox Authorized Training Partner, delivering:

- Network Automation Basic Configuration (NABC)/ 2 days
- Network Automation CCS Scripting (NACS)/ 2 days

### NetMRI Connectors

Whether you need to connect NetMRI to a service desk platform like ServiceNow® or BMC Remedy ITSM Suite® or to another automation platform like Puppet® or RedHat® Ansible™, our team of solution engineers have the connectors to do the job. We can leverage our extensive library of existing NetMRI Connectors or develop a bespoke connector that fits your exact requirements.

### User Experience Solutions

Are there other teams in your organization that could benefit from the data that NetMRI generates, but for compliance or security reasons can't have access? Do you want to increase collaboration and visibility over network change, but don't have an existing platform to do it in? An Empowered NetMRI User Experience Solution could be just the thing for your company. We provide a complete, standalone user experience that can be completely customized to your teams and your use cases.
