Empowered*Advisor*™
for Infoblox NetMRI

EMPOWERED®

Always-On Analysis, Alerts & Advice, based on Vendor Security Advisories

Attackers are knocking. Is your network secure?

Vulnerabilities in network devices are the main entry point for those seeking access to your network and systems. Keeping intruders out is key to protecting corporate and customer data.

Network vendors provide Security Advisory information with increasing cadence and complexity. Your team needs to make sense of this data, determine which vulnerabilities impact your network's security posture, and take timely action to keep your network secure. For many, internal and external compliance requirements make this challenge even more complex.

Infoblox NetMRI is the industry-leading automation solution for enterprise-grade network change, configuration, security policy, and compliance management.

NetMRI helps your team scale to manage dynamic and complex environments.

Empowered*Advisor*™ for NetMRI helps ensure your network is secure & compliant

Always-On Analysis of Security and LifeCycle Advisories
Empowered*Advisor*™ collects and analyzes Security Advisory and other data from key sources, translates that data into rules and policies streamed securely to your NetMRI appliance.

Timely Alerts on the Advisories and Devices that matter
Empowered*Advisor*™ delivers a curated feed of rules and policies, constantly updated, that highlight impacted devices in the context of your network, raising Alerts for the ones that need further review, so your analysts can quickly determine where remediation action is warranted.

Optimize LifeCycle Planning, Detect Unsupported Devices
Unsupported Devices can increase risk and impact compliance. Empowered*Advisor*™ detects devices & software at End-of-Life where new vulnerabilities will not be remediated.

Take Remedial Action, with Streamlined Processes
Where warranted, software updates, bulk changes or other actions can be planned, verified, and scheduled for deployment, leveraging processes, access controls, and audit reporting.

Tight Integration with NetMRI Core Features
Empowered*Advisor*™ rules and policies leverage Device Groups and other core features of NetMRI, reducing the learning curve with configuration guides, compliance reports and more.

Reduce Risk, Validate Compliance and Improve Operational Security
Empowered*Advisor*™ enables you to validate compliance rules with each new Security Advisory and show your network is fully compliant with standards used by internal & external auditors.

Getting Started is Easy

- Need these features, but don't have **Infoblox NetMRI**? We can start there. Empowered offers value-added services for Infoblox NetMRI, too.
- Empowered*Advisor*™ is an Add-on Subscription Service for Infoblox NetMRI, including ongoing Security and LifeCycle Advisory Feeds

Add Empowered*Advisor*™ for NetMRI to your Network Management toolkit today!
